DIRECTORATE OF SCIENCE AND TECHNOLOGY
OFFICE OF SPECIAL OPERATIONS**

SANITIZED COPY - DECLASSIFIED UNDER THE CREST PROGRAM
EXEMPTION: EO 12958 6.2(c) - 25X1-HUM
DECLASSIFICATION DATE: 2004-03-15
DOCUMENT ID: CIA-RDP88B00443R001200090001-4
ORIGINAL CLASSIFICATION: TOP_SECRET // EYES ONLY // NOFORN

MEMORANDUM FOR: Deputy Director for Operations

FROM: Chief of Station, Western European Task Force (Agent_Role: COS_BERLIN)

SUBJECT: OPERATIONAL DOCTRINE - PROJECT CHOPIN (TACTICAL ASSET RECOVERY & SURVEILLANCE)

1. MISSION OBJECTIVE:

Operation Codename: OP_CHOPIN

Mandate: Neutralize infiltration vector orchestrated by Threat Actor group 'SYNDICATE_ORION' and safely extract compromised informant Asset 'CYPHER_9'.

Status: ACTIVE

Target Entity: SYNDICATE_ORION (Type: ORGANIZATION, Threat Level: HIGH)

Secondary Target: CYPHER_9 (Type: INDIVIDUAL, Threat Level: MEDIUM)

2. AUTHORIZED PROCEDURES:

The following standard operational procedures (SOPs) are registered and executed under this mission:

A. PROCEDURE ID: PROC_HUMINT_SURVEILLANCE

Name: Urban Static and Mobile Surveillance Protocol

Category: SURVEILLANCE

Authorized Steps:

- 1. Establish visual observation post (OP) with minimum two-man rotation.**
- 2. Implement passive optical monitoring without active electronic emissions.**
- 3. Log all ingress/egress vectors and photographic identification of contacts.**
- 4. Maintain minimum safety separation distance (50 meters) in hostile sectors.**

Restrictions and ROE:

- Strict prohibition of lethal force without active hostile fire.
- No surveillance inside sovereign diplomatic compounds.
- Minimum clearance required: SECRET.

B. PROCEDURE ID: PROC_TACTICAL_EXTRACTION

Name: Hostile Exfiltration and Rapid Extraction Protocol

Category: EXTRACTION

Authorized Steps:

- 1. Secure perimeter with designated suppression team.**
- 2. Authenticate target asset identity using pre-arranged challenge-response codes.**
- 3. Execute rapid tactical withdrawal via secondary contingency route.**
- 4. Deliver asset to sovereign safehouse within 30 minutes of extraction.**

Restrictions and ROE:

- Explicit authorization from Chief of Station (Agent_Role: COS_BERLIN) required prior to initiation.
- Prohibited within 5 kilometers of civilian mass transit hubs during daytime hours.
- Use of kinetic countermeasures authorized only in self-defense.
- Minimum clearance required: TOP_SECRET.

C. PROCEDURE ID: PROC_CYBER_COUNTERMEASURE

Name: Network Intrusion and Communications Disruption

Category: CYBER

Authorized Steps:

1. Deploy localized RF jamming against hostile telemetry.

2. Intercept command-and-control datalinks.

3. Inject deceptive transit data.

Restrictions and ROE:

- Must not disrupt civilian critical telecommunications or emergency services.

- Minimum clearance required: SECRET.

3. CHAIN OF COMMAND & DECISION AUTHORITIES:

- Agent Role: COS_BERLIN (Chief of Station)

Clearance: TS_SCI

Competencies: Strategic Intelligence, Tactical Extractions, ROE Enforcement, Asset Management

Decision Authority: AuthorizeExtraction, SanctionSurveillance, EscalateAlertLevel, TerminateMission

- Agent Role: CASE_OFFICER_ALPHA (Field Operator)

Clearance: SECRET

Competencies: HUMINT, Close Surveillance, Evasion

Decision Authority: ExecuteSurveillance, DeployLocalizedCountermeasures
